Features & Information

- The SPECTRUM PEIS-PC boasts an environmentally friendly refillable design, allowing for a multitude of medias to be used inside
- PEIS-PC shells offer an ideal and versatile solution for trials or testing applications pre full scale production
- Constructed from durable, highly transparent acrylic to ensure colour changing media can clearly been seen, ideal for maintaining quality resin and phosphate usage
- Pre and post filtration pads prevent media migration, providing quality permeate
- Simple, quick and secure 1/4" connections
- Buna-N O-Ring alongside threaded end-cap to create an extremely secure seal
